IGNITE Mobile App - Service Selfies

- Angela Domingo
- **Forum name:** #Suggestion

Once taking a photo in IGNITE Mobile App, Service Selfies, it doesn't save the photo to your photo album or allow you to save the photo that was taken. If you don't send the photos through IGNITE, you may lose the photos. Should allow the app to save the photos to your photo album by default or provide an option to save the photos that were taken through the app.
